RE: Permit Applicability Determination
Tian Reclamation & Contracting, Inc.
Statewide
Determination No. PD17-026
Plant ID No. 777-00146

Dear Mr. Hannigan:

It has been determined that a permit will not be required under 45CSR13 for your proposed construction and relocation of a 135 Tons/hour BL Pegson Metrotrak 24 X 36 crusher. This determination is based on information included with your permit determination form received January 5, 2017, which indicates that the increase in emissions will not exceed two (2) lbs/hr OR five (5) tons/year of total Hazardous Air Pollutants (HAPs); six (6) lbs/hour AND ten (10) TPY of any regulated pollutant; or trigger a substantive requirement of any State or Federal air quality regulation.

This determination is consistent with PD05-064 Issued by the Division of Air Quality on May 26, 2005 for the same equipment.

Please bear in mind, however, that any additional changes to the proposed facility may require a permit under 45CSR13. Furthermore, pursuant to 45CSR13-5.14, records briefly describing the proposed change, the pollutants involved, the potential to emit for each pollutant increased or added shall be maintained by the owner or operator for at least two years and made available to the Director upon request.

Should you have any questions, please contact the undersigned engineer at (304) 926-0499 ext. 1260.

Sincerely,

Beverly D. McKeone, P.E.
NSR Program Manager
